### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 6) ☐ Other: \_\_\_\_\_.

### DETAILED ACTION

1. This office action is in response to communication filed on 11/1/2007.
2. Claims 2-3, 5-8 are presented for examination.

#### **Claim Rejections - 35 USC § 112**

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 3 and 5 depend from a canceled claim. Correction is required.

#### **Claim Rejections - 35 USC § 103**

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 2-3 and 5-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ikeda (5,937,391 hereinafter Ikeda) in view of Walker et al. (6,338,049 hereinafter Walker).

With respect to claims 2, 5-8, Shinichi teaches system and method of issuing points in a point-service system that can be accessed by a customer using a terminal device via a network (Abstract). A point database recording a number of points accumulated for a customer, the points issued to the customer by a plurality of point-usable facilities and recording the number of points issued to the customer by each point-usable facility along with identifying information for each point-usable facility (i.e.

point management unit 2); means for receiving from the customer, requests for a number of reserved points from any one of the plurality of point-use facilities from among the accumulated number of points (Figure 6); means for recording in a use management database identifying information of the customer, the requested number of reserved points from any one of the plurality of point-use facilities from among the accumulated number of points (points redeeming unit 3); means for transmitting data comprising each requested number of reserved points from among the accumulated number of points from among the accumulated number of points and means for verifying a reference request from a point usable facility identifying the number of reserved points (Figure 16). Ikeda further teaches a use status of each requested number of points (Figure 6 teaches keeping track of points that have been redeemed).

With respect to generating recognition codes and providing point use ticket identifying the generated recognition code. Walker teaches user generated traveler's checks (i.e. point use ticket) having completion codes (i.e. generated recognition code). It would have been obvious to a person of ordinary skill in the art at the time of Applicant's invention to have included in the system of Ikeda, the teachings of Walker of generating recognition codes and providing point use ticket identifying the generated recognition code because such a modification would allow for **bearer notes including the generated code without the use having to travel to an issuer location** (Walker co. 1, lines 42-58).

With respect to claims 3, Ikeda further teaches means for subtracting the number of reserved points from the accumulated reserve points for the customer to record the added number of points as a new accumulated number of points in the point database (Figure 16).

### **Response to Arguments**

7. Applicant's arguments with respect to claims 2-3 and 5-8 have been considered but are moot in view of the new ground(s) of rejection.

### **Conclusion**

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
